Jamie,

Heather did model that dataset – see attached.
Let us know if you need anything else.

Peter — I did the modeling; attached is the output. We have not prepared any summary tables for this.

Heather

Peter,
I have a random BaP question for you...did SRC do the BMD modeling for the cervical hyperplasia from the Gao study? If so, I cant seem to find the outputs in the last draft SRC sent to EPA below. If SRC did the modeling, can you please send the outputs.
Jamie

▼ "McClure, Peter" ---11/22/2011 12:04:16 PM---Jamie et al.: Attached is SRC's working draft of the Toxicological Review of Benzo[a]pyrene. Change

Jamie et al.:

Attached is SRC's working draft of the Toxicological Review of Benzo[a]pyrene. Changes from the August version of the document are noted either in Trackchanges or redfont. Numerous notes to EPA are embedded in an attempt to let you know what we have done and what remains to be done. We did not do a comprehensive technical editing of the document, since it is still in a developmental stage, however we added a new table to Chapter 4 and updated table numbers accordingly.

Please give me call with any questions or comments.

Peter, Julie, and Heather,

I just wanted to find out the status of the revised BaP draft. Last time we talked I thought we agreed on the end of last week. Thanks,

Jamie

Jamie,
Thank you for the information you provided in the call today. On November 14 or 15, we will send you an interim draft document with revisions made in response to interagency science consultation review comments. The draft will also contain embedded comments highlighting issues which remain to be resolved on the RfD and the dermal slope factor. Perhaps we will be able to resolve some of these issues following Kathleen Newhouse's return to IRIS on November 21.

Peter
